## City Health Director Gets Sandia Clearance

To provide an exchange of information in the area of health-physics, Larry Gordon, head of the City Health Department, has been granted a full security clearance so that he may enter classified areas at Sandia Laboratories.

The clearance was arranged at the request of William Kingsley, supervisor of Sandia's Industrial Hygiene Division. "Mr. Gordon's clearance," said Mr. Kingsley, "will give him access to the technical

areas, and thus help him to promote a better understanding by the general public of the activities and programs of industrial hygiene and radiological health at Sandia Laboratory.

Gordon will not spend a specified amount of time at Sandia, but will visit the Laboratory as needed for a mutual exchange of information between the city's and Sandia's health officials.

The inspection of health and sanitation conditions at local industries is a part of Gordon's responsibilities, and as with other industries, Gordon will visit Sandia as an unpaid consultant,
